Partnership Announcement Press Release

JILES INFORMATION TECHNOLOGY CONSULTING SERVICS (JITCS) Joins Secureframe's Service Partner Program

JILES INFORMATION TECHNOLOGY CONSULTING SERVICES (JITCS) is proud to join the Secureframe Service Partner Program, leveraging Secureframe's market-leading compliance and security automation platform to enhance our offerings across government, healthcare, and private-sector industries. With expertise in delivering secure, innovative IT and cybersecurity solutions, JITCS helps federal agencies safeguard critical infrastructures and comply with stringent standards like FedRAMP, FISMA, and NIST. In healthcare, JITCS ensures the protection of sensitive patient data and regulatory compliance with frameworks such as HIPAA, while also supporting private businesses in securing their IT systems and mitigating cyber risks.

By partnering with Secureframe, JITCS can further streamline compliance and bolster security for our clients through automated threat detection, incident response, and continuous monitoring. Together, we are committed to providing organizations with the tools they need to meet evolving cybersecurity challenges, maintain operational resilience, and ensure regulatory compliance across sectors.

"We're excited to welcome JILES INFORMATION TECHNOLOGY CONSULTING SERVICS (JITCS) to our Service Partner Program, which offers the simplest and easiest approach to security and compliance management for our Service Partners," said James Cutrer, SVP of Sales, Secureframe. "By leveraging Secureframe's market-leading platform as the foundation of their service offering, JILES INFORMATION TECHNOLOGY CONSULTING SERVICS (JITCS) can enhance their client's security posture in an easy, effective, and transparent manner."

At the core of the Service Partner Program are Secureframe Fundamentals and Secureframe Complete, a comprehensive platform that simplifies security program management by providing full visibility into an organization's security posture and risk profile. At the heart of Secureframe's Service Partner Program is a multi-tenant management console, gap assessment tool, flexible buying program, and world-class support, allowing partners to deliver value to their clients while also building a competitive advantage.
